

**GT350**

Designed to be balanced, nimble and exhilarating, Shelby GT350 becomes even more exciting for 2017 with an impressive list of changes and enhancements.

**The following features are now standard:**

- Aluminum tower-to-tower brace
- Continuously controlled MagneRide™ Damping System
- Transmission and differential coolers
- Raised decklid spoiler (GT350)
- New exterior colors: Grabber Blue, Lightning Blue, Ruby Red Metallic Tinted Clearcoat
- Technology Package renamed Convenience Package
- Electronics Package optional on Shelby GT350, includes: AM/FM stereo/single-CD with 9 speakers, Dual-zone electronic automatic temperature control, SiriusXM® Radio, Soft door rollover, SYNC® 3, Turn signal indicators on exterior sideview mirrors, Universal garage door opener, Voice-activated Navigation System

**The 5.2L flat-plane crankshaft V8 is unique to Shelby GT350.**

**Key features of this engine include:**

- 526 horsepower @ 7,500 rpm
- 429 lb.-ft. of torque @ 4,750 rpm
- Impressive power density — over 101 horsepower per liter of displacement
- Redline is 8,250 rpm
- Exceptionally wide power band — 90 percent of peak torque from approximately 3,450 rpm through 7,000 rpm
- Paired with TREMEC® TR-3160 6-speed manual transmission

The 180-degree flat-plane layout permits a cylinder firing order that alternates between the two cylinder banks, providing evenly spaced exhaust pressure pulses. The outcome is improved breathing that allows the engine to make more power. It also gives GT350 an engine growl all its own.
